GAIN Report Number: IN5080

India

Food and Agricultural Import Regulations and Standards

Country Report

2005

Approved by:

Michael Riedel U.S. Embassy, New Delhi

Prepared by:

A. Govindan

Report Highlights:

Updated on July 22, 2005. *All sections updated.* *Food Safety Standards Bill in the making.* *Labeling law for infant milk substitutes and infant food modified.* *New standards for raisins, pistachios, and dry fruits and nuts (including almonds) established.* *Permitted food additives and microbiological requirements of thermally processed fruits, fruit cocktail, vegetable soups, fruit juices, fruit vegetable cereal flakes, squashes, tomato ketchup, tomato sauce, soy sauce, jam, jelly, etc. notified.* *Use of additives in sugar, salt, cocoa powder, chocolate, sugar boiled confectionary, and chewing gum specified.*

Includes PSD Changes: No Includes Trade Matrix: No Annual Report New Delhi [IN1]

APPENDIX III. COMMODITY-SPECIFIC FAIRS REPORTS SUBMITTED SINCE LAST	
FAIRS COUNTRY REPORT	16

NOTE: The Office of Agricultural Affairs, US Department of Agriculture, New Delhi, India, prepared this report for US exporters of food and agricultural products. While great care was taken in its preparation, this information may not be entirely accurate either because policies may have changed since the report was written or because clear and consistent information is unavailable. It is highly recommended that US exporters verify import requirements with their foreign customers before goods are shipped. FINAL IMPORT APPROVAL IS ALWAYS SUBJECT TO THE IMPORTING COUNTRY'S RULES AND REGULATIONS AS INTERPRETED BY BORDER OFFICIALS AT THE TIME OF PRODUCT ENTRY.

I. FOOD LAWS

Currently there are more than twenty Indian laws relating to food, which are administered by a number of different Ministries and Departments. Among the more important food laws are:

Prevention of Food Adulteration Act (PFA) of 1954 and the PFA Rules of 1955

The law to protect India against impure, unsafe, and fraudulently-labeled foods is the **Prevention of Food Adulteration Act (PFA) of 1954 with the PFA Rules of 1955**, as amended from time to time. PFA standards and regulations apply equally to domestic and imported products. The PFA covers various aspects of food processing and distribution, such as food color, preservatives, pesticide residues, packaging and labeling, and regulation of sales. **The PFA Act and Rules, and recent notifications are available at:**http://mohfw.nic.in/pfa.htm. The law is enforced by **the Director General of Health Services, Ministry of Health and Family Welfare (MHFW), Government of India (GOI)**, which is somewhat akin to the Food and Drug Administration (FDA) of the United States.

The PFA focuses primarily on the establishment of regulatory standards for primary food products, which constitute the bulk of the Indian diet. The PFA does not always keep pace with advances in the food processing sector. Moreover, PFA rules sometimes appear to be drafted in a manner that goes beyond the mere establishment of minimum product quality specifications, by prescribing recipes for how food products are to be manufactured. Concerned parties may appeal to have the PFA Rules amended. The Central Committee for Food Standards, chaired by the Director General of Health Services, is the decision-making entity. The appeals process, however, is cumbersome and time-consuming. All imported products must adhere to the rules as specified in the regulation, including the labeling and marking requirements.

The Standards of Weights and Measures Act, 1976, and the Standards of Weights and Measures (Packaged Commodities) Rule, 1977

These legislative measures are designed to establish fair trade practices with respect to packaged commodities. The rules aim to ensure that the basic rights of consumers regarding vital information about the nature of the commodity, the name and address of the manufacturer, the net quantity, date of manufacture, and maximum sale price are provided on the label. There may be additional labeling requirements for food items covered under the PFA. The Department of Consumer Affairs, located within the Ministry of Consumer Affairs, Food, and Public Distribution, is the regulatory authority. The entire text of the Standards of Weights and Measures (Packaged Commodities) Rule, 1976, and the Standards of Weights and Measures (Packaged Commodities) Rule, 1977, and related notifications, can be accessed from: http://fcamin.nic.in/wm_ind.htm Importers of packaged food products must adhere to these acts, including labeling the product. The name and address of the importer,

the net quantity, date of manufacture, best-before date, and maximum sales price must be included on the label.

The Fruit Products Order, 1955

The fruit and vegetable processing sector is regulated by the Fruit Products Order, 1955 (FPO), which is administered by the Department of Food Processing Industries. The FPO contains specifications and quality control requirements regarding the production and marketing of processed fruits and vegetables, sweetened aerated water, vinegar, and synthetic syrups. All such processing units are required to obtain a license under the FPO, and periodic inspections are carried out. Processed fruit and vegetable products imported into the country must meet the FPO standards. The FPO can be accessed from: http://mofpi.nic.in/fpoact.pdf.

Meat Food Products Order, 1992

This order administers the permissible quantity of heavy metals, preservatives, and insecticide residues for meat products. The Directorate of Marketing and Inspection, Ministry of Agriculture, is the regulatory authority. This order is equally applicable to domestic processors and importers of meat products. However, its implementation is weak, due to unorganized production in the domestic market and few subject imports. For details, see: http://agmarknet.nic.in/mfpo1973.htm

Livestock Importation Act, 1898

Under the Livestock Importation Act, 1898, the government established procedures for the importation of livestock and related products to India, which are implemented by the Department of Animal Husbandry and Dairying, Ministry of Agriculture. These procedures are available at: http://dahd.nic.in/order/livestockimport.doc

Milk and Milk Products Order, 1992

This order regulates the production, distribution, and supply of milk products; establishes sanitary requirements for dairies, machinery, and premises; and sets quality control standards for milk and milk products. Standards specified in the order also apply to imported products. The Department of Animal Husbandry and Dairying, Ministry of Agriculture, is the regulatory authority. For details see: http://dahd.nic.in/order/mmpo.doc

Plant Quarantine (Regulation of Import into India) Order, 2003

Under the Destructive Insects and Pests Act, 1914, the GOI formulated the Plant Quarantine (Regulation of Import into India) Order, 2003. It was published on November 18, 2003, with "...the purpose of prohibiting and regulating the imports into India of agricultural articles..." The implementing agency is the Directorate of Plant Protection, Quarantine, and Storage, under the Department of Agriculture and Cooperation, Ministry of Agriculture, which is similar to the Animal Plant Health Inspection Service (APHIS) of the USDA. This Order, along with several subsequent amendments, is available at: http://agricoop.nic.in/gazette/gazette.htm, as well as at www.plantquarantineindia.org/PQO_amendments.htm

The Food Safety and Standards Bill, 2005

The GOI is in the process of enacting an integrated food law, which is called the "Food Safety and Standards Bill, 2005," in order to establish science-based standards for articles of food and to regulate their manufacture, import, export, storage, distribution, and sale. The Bill

would bring all existing food-related legislation under one umbrella, which would entail the establishment of a Food Safety and Standards Authority of India. It is expected that the Bill will pass through Parliament by the end of 2005 or early 2006. The full text of the Food Safety and Standards Bill, 2005, is available at: http://mofpi.nic.in/foodsfty.htm

II. LABELING REQUIREMENTS

A. General Requirements: **Part VII of the PFA Rules, 1955,** and **the Standards of Weights and Measures (Packaged Commodities) Rules, 1977**, as amended, establish labeling requirements for all packaged foods. In general, the label should provide the following information:

- Name, trade name, or description of product
- Name of ingredients used in the product, in descending order of their composition by weight or volume
- Name and complete address of manufacturer, packer, importer, or vendor, and country of origin of the imported food (including if the food article is manufactured outside India and packed in India)
- Net weight, number, or volume of contents
- > Distinctive batch, lot, or code number
- Month and year the product was manufactured or packed
- Month and year by which the product is best consumed
- Maximum retail price (MRP)

Where applicable, the product label should also contain the following:

- > The purpose of irradiation and license number, in case of irradiated food
- Extraneous addition of coloring matter
- Non-vegetarian food (any food which contains whole or part of any animal including birds, marine animals, eggs, or product of any animal origin as an ingredient, excluding milk or milk products), must have a symbol of a brown color-filled circle inside a square with a brown outline prominently displayed on the package, contrasting against the background on the principal display panel, in close proximity to the name or brand name of the food.
- Vegetarian food must have a symbol of a green color-filled circle inside a square with a green outline prominently displayed on the package, contrasting against the background on the principal display panel, in close proximity to name or brand name of the food.

There are special labeling requirements for certain packaged food items, such as infant foods, condensed milk, milk powder, blended vegetable oils, etc. For details see Section 42, Part VII of the PFA Rules updated on October 1, 2004,

(<u>www.mohfw.nic.in/pfa%20acts%20and%20rules.pdf</u>) and any subsequent notifications.

In the case of imported packaged food, all declarations may be 1) printed on a label securely affixed to the package or 2) made on an additional wrapper containing the imported package or 3) printed on the package itself or 4) made on a card or tape affixed firmly to the package or container and bearing the required information. Labels must be printed in English or Hindi (Devnagari script). The responsibility for labeling lies with the importer, and should be done before products are presented for custom clearance. Products exhibiting only the standard US label will not be allowed to enter.

Per Notification No. 44 (RE-2000)/1997-2002, issued by the Department of Commerce on November 24, 2000, all packaged commodities imported into India should carry the following declarations:

- Name and address of the importer.
- Generic or common name of the commodity packed.
- Net quantity using standard units of weights and measures. If the net quantity of the imported package is given in any other unit, its equivalent terms of standard units shall be declared by the importer.
- Month and year of packaging in which the commodity was manufactured, packed, or imported.
- The MRP at which the commodity in packaged form may be sold to the ultimate consumer. This price shall include all taxes, local or otherwise, freight, transport charges, commission payable to dealers, and all charges towards advertising, delivery, packing, forwarding, and the like.

http://daftcom.nic.in/exim/2000/not/not00/not4400.htm

Shelf Life: Notification No. 22 (RE-2001) 1997-2002, dated July 30, 2001, issued by the Department of Commerce, states:

"Imports of all such edible/food products, domestic sale and manufacture of which are governed by the PFA shall also be subject to the condition that, at the time of importation [emphasis added], these products are having a valid shelf life of not less than 60 percent of its original shelf life. Shelf life of the product is to be calculated, based on the declaration given on the label of the product, regarding the date of manufacture and the due date of expiry." http://dgftcom.nic.in/exim/2000/not/not01/not2201.htm

Per notification G.S.R. 388 (E), issued by the Department of Health, on June 25, 2004, every package of food which contains permitted artificial sweetener shall carry the label "CONTAINS ARTIFICIAL SWEETENER AND FOR CALORIE CONSCIOUS," along with the name or trade name of the product. (www.mohfw.nic.in/GSR%20388(E).pdf)

Per notification G.S.R. 339 (E), dated May 27, 2005, issued by the Department of Health, "No containers or label relating to infant milk substitute or infant food shall have a picture of infant or women or both. It shall not have picture or other graphic materials of phrases designed to increase the salability of the infant milk substitute or infant food. The terms "Humanized" or "Maternalized" or any other similar words shall not be used. The package and/or any other label of infant milk substitute or infant food shall not exhibit words, "Full Protein Food," "Energy Food," "Complete Food," or "Health Food," or any other similar expressions." (www.mohfw.nic.in/F33927052005.pdf)

B. Requirements Specific to Nutritional Labeling

Implied nutritional and health claims are allowed on food products, and there are no statutory nutritional requirements. Manufactured and imported food claiming to be enriched with nutrients such as minerals, proteins, or vitamins, should indicate quantities of such added nutrients on the label. Although there is no official position on implied health claims, such claims should be able to withstand verification by a court of law, if challenged.

III. PACKAGING AND CONTAINER REQUIREMENTS

All weights or measures are to be reported in metric units.

Certain commodities can only be packed in specified quantities (weight, measure, or number). These include baby food, weaning food, biscuits, bread, butter, coffee, tea, vegetable oils, milk powder, and wheat and rice flour. The use of materials such as Polyvinyl Chloride (PVC) is not allowed for packaging in most cities, due to environmental concerns and waste disposal problems.

IV. FOOD ADDITIVE REGULATIONS

Information regarding permitted coloring matter, preservatives, etc., are provided in various sections of the PFA Rules, 1955, as amended, which are listed below:

Coloring Matter	Part VI
Preservatives	Part X
Poisonous metal	Part XI
Crop contaminants and naturally	
occurring toxic substances	Part XIA
Anti-Oxidants, Emulsifying,	
Stabilizing, and anti-caking Agents	Part XII
Flavoring agents and related Substances	Part XIII
Carry over of food additives	Part XIIA
Sequestering and buffering agents	Part XVI
Antibiotic and other pharmacologically	
active substances	Part XVIII
Food Additives 1/	Part XIX

1/ Per Gazette notification G.S.R. 388 (E), dated June 25, 2004, (www.mohfw.nic.in/GSR%20388(E).pdf)

On August 13, 2003, the Department of Health issued a final Gazette notification under the PFA Act that prohibited the sale of fresh fruits and vegetables coated with waxes (both edible and non-edible), mineral oils, and colors. www.mohfw.nic.in/656(E)Dated13.8.03.pdf

On December 1, 2004, the Department of Health issued a final Gazette notification that lists permitted food additives in fish and fish products and microbiological requirements of seafood. www.mohfw.nic.in/GSR821(E)21102004.pdf

On March 21, 2005, the Department of Health issued a final Gazette notification under the PFA Act that pertains to the use of additives in sugar, salt, cocoa powder, chocolate, sugar boiled confectionary, and chewing gum.

www.mohfw.nic.in/F18421032005.pdf

On March 21, 2005, the Department of Health issued a final Gazette notification under the PFA Act that provided a list of permitted food additives and microbiological requirements of thermally-processed fruits, fruit cocktail, vegetable soups, fruit juices, fruit vegetable cereal flakes, squashes, tomato ketchup, tomato sauce, soy sauce, jam, jelly, etc. www.mohfw.nic.in/F18521032005.pdf

V. PESTICIDES AND OTHER CONTAMINANTS

The PFA Rules, 1955, include a positive list for the presence of pesticide residues in various commodities and food (manufactured/imported) products, and their respective tolerance levels. Of the 189 pesticides registered (http://cibrc.nic.in/reg_products.htm) for regular use in India, only 121 (www.mohfw.nic.in/pfa%20acts%20and%20rules.pdf, Part XIV pages 163-177) have Maximum Residue Limits (MRLs) notified. There are 27 pesticides that do not require MRLs. For the remaining pesticides, MRLs have not yet been established. CODEX Alimentarius MRLs may be accepted for imported foodstuffs only for those pesticides not included in India's own positive list of pesticides.

VI. OTHER REGULATIONS AND REQUIREMENTS

All imported foods are randomly sampled at the port of entry for their conformity to PFA standards. On June 16, 2004, with immediate effect, the Ministry of Commerce and Industry published a list of "high risk" food items, imports of which are subject to 100 percent sampling. This list includes edible oils and fats, pulses and pulse products, cereal and cereal products, milk powder, condensed milk, food colors, and food additives, among other items. The import of product samples via express mail or parcel post is allowed, contingent on obtaining prior permission from the Directorate General of Foreign Trade. Mail order imports are not allowed. Contact information to arrange sample shipments is provided in Appendix I. Once the products enter the domestic market, they are to be monitored randomly at the retail and wholesale level by the respective regulatory authorities.

The **Genetic Engineering Approval Committee (GEAC)** is the decision-making authority on allowing imports of bioengineered products. Food ingredients and additives containing bioengineered organisms shall not be produced, used, or imported without the approval of the GEAC. All such approvals, if granted, shall be for a specific period not exceeding four years at the first instance, and are renewable for 2 years at a time, subject to terms and conditions. For additional details see: www.dbtindia.nic.in/thanks/biosafetymain.html.

VII. OTHER SPECIFIC STANDARDS

The PFA Rules, 1955 (Appendix B), and the Fruit Products Order, 1955, as amended, contain definitions and specific quality standards for certain food products, such as processed cheese, ice cream, spice mixes, milk and milk products, infant food, vegetable oils and margarine, fruits and vegetable products, and basic food items like wheat, rice, and pulses. Imported products must also meet the specified quality standards.

The Department of Commerce Notification No. 44 (RE-2000)/1997-2002, dated November 24, 2000, requires imports of certain products, including some food products (milk powder, condensed milk, infant milk foods, milk-cereal based weaning foods) and food additives, to comply with mandatory Indian quality standards. All manufacturers and exporters whose products are sold in India are required to register with the Bureau of Indian Standards. http://dgftcom.nic.in/exim/2000/not/not00/not4400.htm However, the enforcement of this regulation has not been strict, as current import volumes of the concerned products have been small (mostly in mixed containers).

On March 21, 2005, the Department of Health issued a final Gazette notification under the PFA, which establishes new standards for raisins, pistachios, and dry fruits and nuts (including almonds). www.mohfw.nic.in/F18521032005.pdf

VIII. COPYRIGHT AND/OR TRADEMARK LAWS

The Indian Copyright Act of 1957 is based on the Bern Convention on Copyrights, to which India is a party. May 1995 and December 1999 amendments increased protection and introduced stiff mandatory penalties for copyright infringement. On paper, Indian copyright law is now on par with the most modern laws in the world. Trademark protection was raised to international standards with the passage of a new Trademark Bill in December 1999. It codified the use and protection of foreign trademarks, including service marks. Enforcement of intellectual property rights has been weak, but the situation is improving, as the courts and police respond to domestic concerns about the high cost of piracy to Indian rights holders.

There is significant judicial precedence to protect foreign trademarks in India. Indian courts have gone beyond the existing statutes and restrained local companies from using world-renowned trademarks even when they have not been registered in India. Nevertheless, foreign firms can register their trademarks through a local agent by applying at the office of Registrar of Trademarks (www.ipindia.nic.in). However, it may take 3-5 years for the trademark to be officially accepted and notified.

IX. IMPORT PROCEDURES

Documentation: Importers must furnish an import declaration in the prescribed Bill of Entry format, disclosing the value of the imported goods. This must be accompanied by any import licenses and phytosanitary certificates (in case of agricultural commodities), along with documentation such as sales invoices and freight and insurance certificates. All consignments are required to be inspected prior to clearance. In the current Customs setup, appointing a clearing agent avoids delays.

The clearance of imported food products at the port of entry requires a certification from the port health authority that the product conforms to the standards and regulations of the PFA. However, certification is based mostly on visual inspection and records of past imports, as most ports have very limited testing facilities. Consequently, importers of new products can sometimes face undue delays in clearing their products. The custom clearance period may last between one day and one month, depending on the product and experience of the importer. In case of a dispute or rejection of the consignment, the importer can file an appeal at the Customs office at the port of entry.

Additional information on exporting food products to India is available in the "Exporter Guide" (GAIN Report #IN4103), which can be accessed via the FAS homepage.

APPENDIX I. REGULATORY AGENCY CONTACTS

A. Prevention of Food Adulteration Act

Joint Secretary (PFA)
Department of Health
Ministry of Health & Family Welfare
Nirman Bhawan
Maulana Azad Road

Maulana Azad Road New Delhi, 110 - 001

Phone: (91-11) 23061195 Fax: (91-11) 23061842 E-mail: dghs@nb.nic.in

Website: www.mohfw.nic.in/pfa.htm

B. The Standards Weights and Measures Act

Additional Secretary (Weights & Measures)

Department of Consumer Affairs

Krishi Bhavan

New Delhi - 110 001

Phone: (91-11) 23383027 Fax: (91-11) 23386575 E-mail: as-ca@fca.nic.in

APPENDIX II. LIST OF APPROVED FOOD ADDITIVES

- I. Coloring Matter
- A. Natural Coloring Matters
- 1. Beta-carotene
- 2. Beta-apo-8'-carotenal
- 3. Methylester of Beta-apo-8' carotenoic acid
- 4. Ethylester of Beta-apo-8' carotenoic acid
- 5. Canthaxanthin
- 6. Chlorophyll
- 7. Riboflavin/Lactoflavin
- 8. Caramel
- 9. Annatto
- 10. Saffron
- 11. Curcumin (or Turmeric)
- B. Synthetic Coloring Matters
- 1. Ponceau 4R
- 2. Carmoisine
- 3. Erythrosine
- 4. Tartrazine
- 5. Sunset Yellow FCF
- 6. Indigo Carmine
- 7. Brilliant Blue FCF
- 8. Fast Green FCF

Note: Maximum limit of permitted synthetic coloring matters is 100 parts per million.

For details on uses and other terms and conditions relating to coloring matter, please see Part VI of the PFA Rules updated, on October 1, 2004,

(www.mohfw.nic.in/pfa%20acts%20and%20rules.pdf), and any subsequent notifications.

- II. Preservatives
- A. Class I Preservatives
- 1. Common Salt
- 2. Sugar
- 3. Dextrose
- 4. Glucose (Syrup)
- 5. Spices
- 6. Vinegar or Acetic Acid
- 7. Honey
- 8. Edible oils
- B. Class II Preservatives
- 1. Benzoic acid including salts thereof
- 2. Sulphurous acid and salts thereof
- 3. Nitrates of Sodium or Potassium
- 4. Sorbic acid and its sodium, potassium and calcium salts
- 5. Nisin
- 6. Sodium and calcium propionate
- 7. Methyl or propyl Parahydroxy Benzoate
- 8. Propionic acid, including esters or salts thereof
- 9. Sodium diacetate
- 10. Sodium, potassium and calcium salts of lactic acid

The maximum allowable limit for class II preservatives varies with the type of food in which it is used. There is no maximum allowed limit in the use of class I preservatives.

For details on the specific use and other terms and conditions relating to preservatives, please see Part X of the PFA Rules, updated on October 1, 2004, (www.mohfw.nic.in/pfa%20acts%20and%20rules.pdf), and any subsequent notifications.

III. Poisonous Metal

- 1. Lead
- 2. Copper
- 3. Tin
- 4. Zinc
- 5. Cadmium
- 6. Arsenic
- 7. Mercury
- 8. Methyl mercury
- 9. Chromium

Tolerance limits for poisonous metals vary with the food in which they appear.

For details on the specific use and other terms and conditions relating to poisonous metals, please see Part XI of the PFA Rules, updated on October 1, 2004, (www.mohfw.nic.in/pfa%20acts%20and%20rules.pdf), and any subsequent notifications.

IV. Anti-oxidants, Emulsifying, Stabilizing, and Anti-Caking Agents

A. Anti-Oxidants

- 1. Lecithin
- 2. Ascorbic acid
- 3. Tocopherol
- 4. Ethyl gallate
- 5. Propyl gallate
- 6. Octyl gallate
- 7. Dodecyl gallate
- 8. Ascrobyl palmitate
- 9. Butylated hydroxyanisole (BHA)
- 10. Citric acid
- 11. Tartaric acid
- 12. Gallic acid
- 13. Resin Guaiac
- 14. Tertiary Butyl Hydro Quinone (TBHQ)

B. Emulsifying and stabilizing agents

Permitted emulsifying and stabilizing agents include:

Agar, alginic acid, calcium and sodium alginates carrageen, edible gums (such as guar, karaya arabic, carobean, furcellaran, tragacanth, gum ghatti), dextrin, sorbitol, pectin, sodium and calcium pectate, sodium citrate, sodium phosphates, sodium tartrate, clacium lactate, lecithin, albumen, gelatin quillaia, modified starches, hydrolysed, proteins, monoglycerides or diglycerides of fatty acids, synthetic lecithin, propyleneglycol stearate, propylenegylcol alginate, methyl ethyl cellulose, methyl cellulose, sodium carboxymethyl cellulose, stearyl tartaric acid, esters of monoglycerides and digylcerides of fatty acids, monosterin sodium sulphoacetate, sorbitan esters of fatty acids or in combination, polyoxy-

ethylene sorbiton monostenrate, sodium stearoyl-2-lactylate and calcium stearoyl-2 lactylate, Polyglycerol Esters of fatty acids and polyglycerol Ester of interesterified Ricinoleic acid, and brominated vegetable oil, Glycerol esters of wood resins (Ester Gum).

For details on the specific use and other terms and conditions relating to anti-oxidants, emulsifying, stabilizing, and anti-caking agents, please see Part XII of the PFA Rules updated on October 1, 2004, (www.mohfw.nic.in/pfa%20acts%20and%20rules.pdf), and any subsequent notifications.

V. Flavoring Agents and related substances

All flavoring agents other than the following may be used in food

- 1. Coumarin and dihydrocoumarin
- 2. Tonkabean (Diptery adorat); and
- 3. B-asarone and cinamyl anthracilate
- 4. Estragole
- 5. Ethyl Methyl Ketone
- 6. Ethyl-3-Phenylglycidate
- 7. Eugenyl methyl ether
- 8. Methyl Beta napthyl Ketone
- 9. P. Propylanisole
- 10. Saffrole and Isosaffrole
- 11. Thujone and Isothujone alpha and beta thujone

For details on the specific use and other terms and conditions relating to flavoring agents ad substances, please see Part XIII of the PFA Rules updated on October 1, 2004, (www.mohfw.nic.in/pfa%20acts%20and%20rules.pdf), and any subsequent notifications.

VI. Sequestering and buffering agents

The following sequestering and buffering agents are allowed, subject to limits prescribed in the PFA rules.

- 1. Acetic acid
- 2. Adlipic acid
- 3. Calcium gluconate
- 4. Calcium carbonate
- 5. Calcium oxide
- 6. Citric acid
- 7. Malic acid
- 8. DL Lactic acid (food grade)
 - a) L (+) Lactic acid (food grade)
- 9. Phosporic acid
- Polyphosphate containing less than 6 phosphate mouties
- 11. L (+) Tartaric acid
- 12. Calcium Disodium, Ethylene, diamine tetra acelate
- 10. Fumeric acid.

For details on specific use and other terms and conditions relating to sequestering and buffering agents, please see Part XVI of the PFA Rules updated on October 1, 2004, (www.mohfw.nic.in/pfa%20acts%20and%20rules.pdf) and any subsequent notifications.
